

Our unit question is:

## What are the difficulties facing Mother Earth today?

You need to answer this question and present it in an interesting way, You will have 2 lessons to complete this task so choose only the most appropriate information.

The following question will help you.

How is the Earth affected by man's use and misuse of resources?

Look at Global warming, pollution and sustainable energy resources. Use the Antarctica case study and up to date information to support your statements.

You also need to comment on what is being done to alleviate (reduce) the difficulties. Look at what is being done regarding alternative energy resources.
