

Interpretation of Policies on New National Standard Electric Bicycles

The *Safety technical specification for electric bicycles* (hereinafter referred to as the “new national standard”) will be officially implemented on Apr. 15, 2019. According to the unified arrangement and demand of the provincial government, the traffic administrative department of the municipal public security organ will, in line with the new standard, strictly regulate the procedures for license plate registration of electric bicycles. With the implementation of the new standard, safety management work for electric bicycles in Nanjing will be further strengthened, and a more civilized, harmonious, unimpeded, and orderly road traffic environment will be created for the citizens.

I. How will Nanjing facilitate the implementation of the new national standard?

Upon the implementation of the *Safety technical specification for electric bicycles* on Apr. 15, the former *Product Registration Category of Electric Bicycles in Jiangsu Province* will be abrogated and the license plate registration will be closed for electric bicycles up to the old standard.

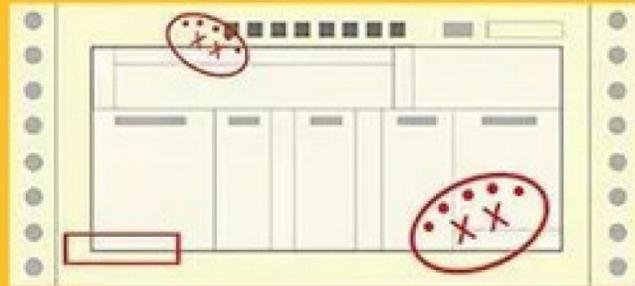

Owners of electric bicycles, which meet the new national standard and have been certified by CCC, should present documents, such as an identity certificate (if an agent is entrusted, a power of attorney and an identity certificate of the agent shall be provided), a purchase invoice, and a certificate of quality, to apply for a new-style license plate free of charge after their bicycles are inspected at the licensing site.

The licensing site: Vehicle Administration Office of Nanjing City (No. 68, Dongfang Cheng, Xuanwu District)

Owners, who have been offered an old-type license plate and whose electric bicycles meet the new national standard, may continue to use the license plate or replace it with a new-style one free of charge.

China Compulsory
Certification

Bicycle ex-factory quality
certificate

II. What are the features of the new-style license plate?

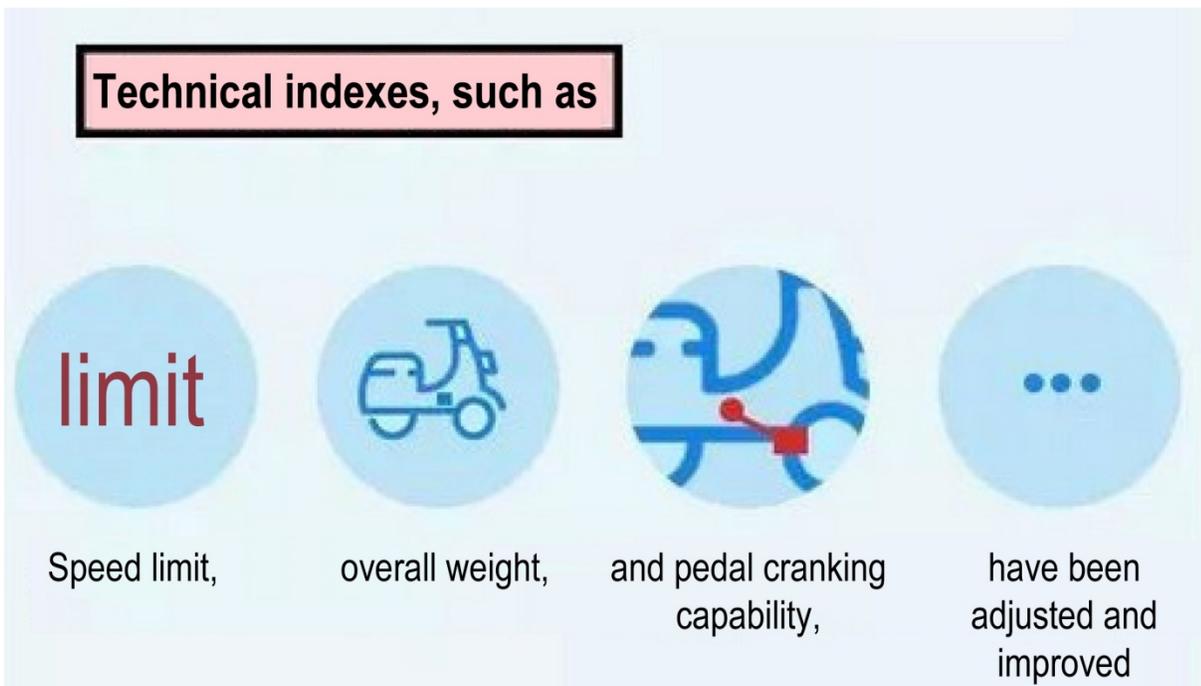

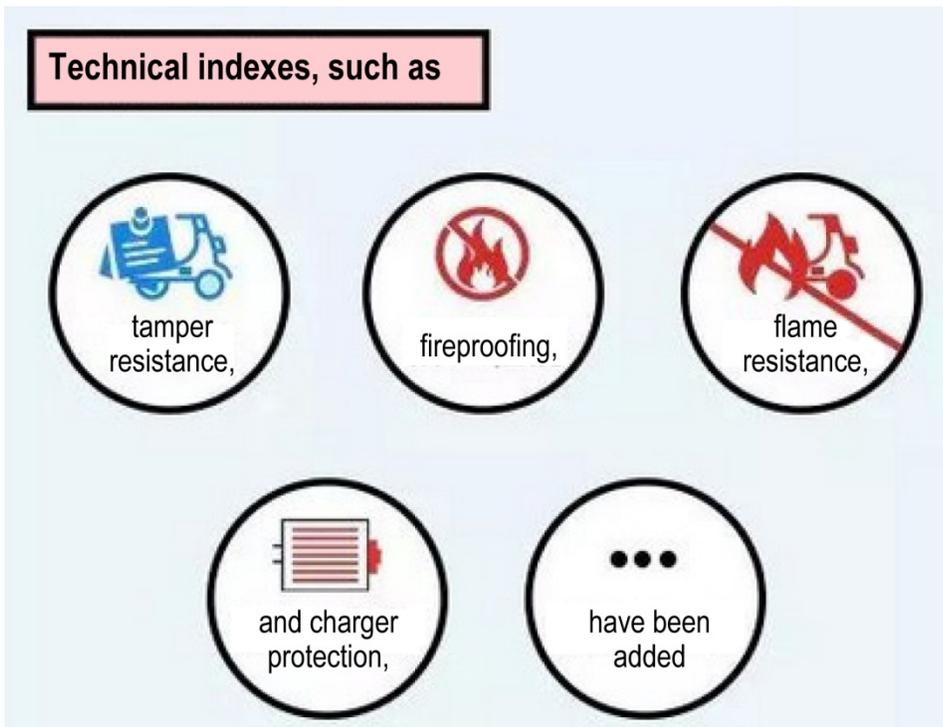

According to relevant requirements of the provincial Public Security Department, and in order to meet the needs of Nanjing's traffic and public security management for intelligence- and information-based development, the new-style license plate is made of eco-friendly materials, 16cm long and 10cm wide, with white characters

on a green background. Its built-in anti-counterfeit chip can guarantee uniqueness. It is coded with both letters and numbers.

III. What are the changes in the new national standard?

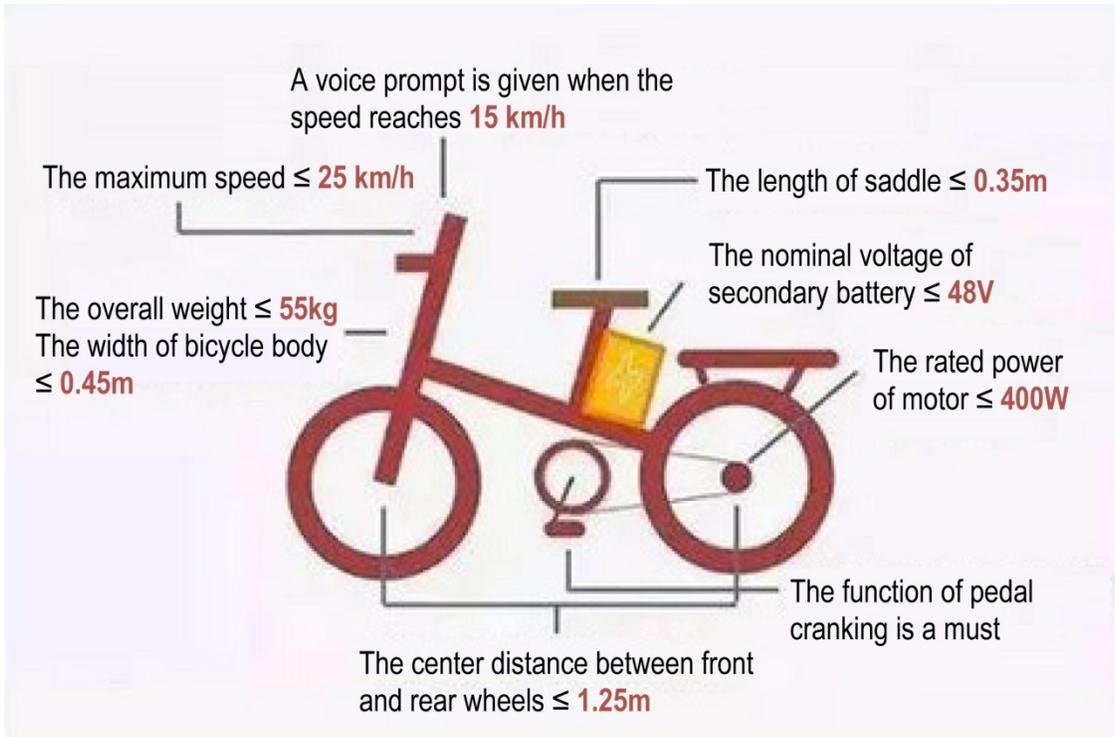

Comparison between the new national standard and the old one

Especially, two safety indexes, i.e. fireproofing and water resistance, have been added.

More colloquially, an electric bicycle which meets the new national standard must have two wheels, two pedals, a lithium battery, and a seat cushion. Its maximum speed shall not exceed 25KM/H. Its overall weight

(including battery) shall be less than 55KG. Its motor power shall not exceed 400W. As a reminder, according to the new national standard, an electric bicycle must have the function of pedal cranking.

Can license plates be issued to substandard electric bicycles?

If you purchased a substandard electric bicycle before Apr. 15 and **failed to get the license plate before Apr. 15, the bicycle is subject to the registration administration. The registration period ends on Jun. 15, 2019.** Registered electric bicycles will get a temporary license plate issued by the traffic administrative department of public security organ.

The validity period ends on Dec. 31, 2020. Upon the expiry of the validity period, such electric bicycles shall be prohibited from driving on the road.
