Face Masks and Foggy Glasses: A COVID Consequence

By Sandra Young

In-text citation:

...(author, date)...

Some remedies to avoid glasses fogging up while wearing a mask include chemical sprays and dishwashing liquids (Young, 2020).

...author...(date).

Young says the reason for glasses fogging up is that the mask is loose, especially along the bridge of the nose (2020).

Author “...” (date, page or paragraph or section).

Young says that “focusing on the proper seal is more important than focusing on these anti-fogging solutions” (2020, “Why Glasses Fog” section).
