Change -

How have you changed/What change(s) have you made or will make?

Demonstration -

Demonstrate/explain how you achieved the learning outcome.

CHANGE: I learned to work with a group of people who I don't normally hang out with because they are in different grades. There are some younger students that me so I taught them how to make the gift bags from old calendar pages. I also learned by trial and error. Sometime I cut the page too small so the bags I made were really small. I also realised that I like making different projects each time and not making the same thing over and over.

DEMONSTRATION: I achieved the outcome of global engagement because our group is repurposing old calendar pages. We have lots of extra calendars because we started school late and the holidays were changed. A decision was made to reprint all the calendars but we need to do something with all the old ones. We are not using any new materials. There are lots of calendars that won't be used so my group collected them. We searched on the internet what we could do with them. We found that we could make small gift bags and bee hotels. The bee hotels also need a tin can. We roll up the calendar pages into tubes and put them into empty tin cars. The purpose of the bee hotel is to provide a place for bees to lay their eggs. We need bees because they pollinate plants. We followed this website:

https://www.gardenmyths.com/be...
So we repurposed old calendars to make these bags and puzzles:
