Dear Colleagues,

Are you interested in...

- fostering a stronger sense of belonging and community at NIS?
- or being engaged, supported, and developed alongside a diverse group of individuals across NIS in order to facilitate sustainable DEI organizational change?
- what about learning and growing alongside colleagues while also strengthening and deepening your relationships?
- or having a facilitative role in creating an NIS community you can be proud of?

If you answered yes to one or more of the above questions, serving on the JEDI Change Taskforce may be for you!

We are looking for 4 staff members to support our school in leading and facilitating organizational JEDI change efforts. This will run in parallel with our accreditation self-study for the rest of the 2022-23 school year.

JEDI Change Taskforce members, in close collaboration with school leadership, facilitate and support the transformational change process through organizing and implementing the school's strategic DEI goals. JEDI Change Taskforce members lead and engage in DEI initiatives in a variety of areas including: teaching and learning, people and culture, and strategic direction and are liaisons to and with the broader community. DEI Change Taskforce members are responsible for gathering input, providing strategic visioning, and communicating regular updates on strengths, opportunities, and challenges related to DEI within the NIS community.

We welcome everyone who is interested to apply for the JEDI Change Taskforce. While we may not be able to have everyone serve on the task force this year, we will continue to provide opportunities for everyone in our inclusive learning community to be engaged in our DEI efforts.

If you have any questions, feel free to reach out to Laurie.

  
Laurie McLellan  
Director
